

IBF™

Irritable Bowel Formula

IBF™ is a combination of peppermint and caraway oils in an enteric-coated capsule, which is highly effective in relieving cramps and abdominal pain associated with I.B.S. Enteric-coating prevents acid reflux associated with peppermint oil and allows the ingredients to travel through the stomach and dissolve in the colon, where it can be effective. IBF™ has been clinically tested to relieve systems (e.g. spasm) associated with I.B.S.

Ingredients: Each softgel contains:

Mentha piperita (Peppermint oil) extract0.2 ml
Carumcarvi extract (Caraway oil)0.2 ml

Mode of action

Relaxes the muscle of the intestinal tract, relieves spasms, bloating and abdominal pain
Anti-spasmodic and carminative

FORM: 90 Softgel Capsules

CODE: 10708

ADULT DOSAGE: Take one capsule between meals three times daily or as directed by a practitioner.
Not recommended for children under the age of 12.

Luvos™

Gastric/Duodenal Ulcers, Colitis, Dysbiosis

Called "healing earth" in Germany, Loess (LUVOS) is a 100% pure natural mineral earth product (without additives) that is mined from mineral rich ice age deposits from an unpolluted area in Germany. Luvos is used internally as a gastrointestinal therapeutic product by acting as a cleansing sponge in absorbing impurities from the gastro-intestinal (GI) system. Luvos can also be used externally for skin complaints such as burns, skin inflammations and lymphatic vessel inflammation.

Ingredients: Each teaspoon contains:

Luvos™ healing earth. 5 g

Mode of action

See above for mode of action

FORM: 200 g Powder

CODE: 11265

ADULT DOSAGE: Internal (oral): Take half to one teaspoon in a glass of water two times a day (morning and evening) up to three teaspoons daily or as directed by a practitioner.
External (topical): Mix Luvos in water to make a paste. Apply the paste onto affected area. Let the paste dry then rinse with warm water.

N-A-G (N-acetyl-glucosamine)

Ulcers, I.B.S, Crohn's Disease, Colitis

N-A-G is a single ingredient product that aids in the formation of the complex molecular structure of the mucous membranes in the intestinal lining. Persons suffering from ulcers, I.B.S., Chron's Disease, Colitis and other inflammatory disorders lack the ability to naturally manufacture enough N-A-G to maintain the protective barrier that safeguards the intestinal lining from digestive enzymes and other potentially damaging intestinal contents. N-A-G supplementation provides the body with the precursors required to repair wounded tissue and replace mucous membranes.

N-A-G is also an excellent product for musculoskeletal health as N-acetyl-glucosamine is important in the formation of connective tissue: bones, tendons, ligaments, cartilage and synovial fluid.

Ingredients: Each capsule contains:

N-A-G (N-acetyl-glucosamine) 500 mg

Mode of action

See above for mode of action

FORM: 120 Vegetarian Capsules

CODE: 10703

ADULT DOSAGE: Take two capsules a day or as directed by a practitioner.
