

LYMPH DRAINAGE PROTOCOL

Lymph Drainage

LYMPH-A-DERM indicated for lymphatic drainage and to support the body's elimination organs (liver, biliary tract, skin, lungs and pastor intestinal tract) and for swollen glands or lymph nodes.

Dosage: apply topically 1 - 3 times daily onto the affected area (e.g. lymph nodes in the neck, arm pits or groin).

LYMPH-A-DROP indicated for systemic lymphatic drainage and to support the body's elimination organs.

Dosage: 10 drops three times a day.

Spleen Support

POLYPODY indicated for spleen support (as it is the largest organ of the lymphatic system).

Dosage: 10 drops three times a day.

Diuretic, Edema and Blood Cleansing

PARSAGUS indicated for stimulating drainage of fluids

Dosage: 4 capsules three times daily.

LAPPA indicated as a blood purifier and lymph stimulator by increasing elimination of metabolic wastes.

Dosage: 20 - 30 drops in water one to two times daily.

Note: Lymph drainage treatment is patient specific and dependent on use for as a prophylactic or for post surgical treatment.
