

PROSTATE CONDITIONS PROTOCOL

General Condition

SABAL SERRULATUM

indicated for all prostate conditions e.g. enlarged prostate, prostatitis, and chronic bladder irritation.

Dosage: 25 drops in 2 oz (60mL) of pure warm water three times daily.

SOLIDAGO indicated for prostate, bladder, urinary tract and kidney conditions.

Dosage: 40 drops in 2 oz (60mL) of pure warm water three times daily.

For best results, combine SABAL SERRULATUM and SOLIDAGO together in 8 oz (236 ml) pure warm water three times daily between meals.

Acute Conditions

SABAL SERRULATUM

Dosage: 10 drops in water every 30 minutes until improvement is evident.

SOLIDAGO

Dosage: 40 drops in pure water up to five times daily. Dosage and frequency can be reduced after symptoms decrease.

Prostate Enlargement, Inflammation and BPH (Benign Prostatic Hypertrophy)

In addition to SABAL SERRULATUM and SOLIDAGO as indicated in prostate conditions Add FLEXIZYME (proteolytic enzyme) to reduce acute and chronic inflammation.

Dosage: 2-4 capsules three times daily between meals.

Treatment Duration: Three months or longer.
