

CandFiX Kit

Candida is naturally occurring in the mouth, gastrointestinal tract, vaginal tissue and skin. Under healthy conditions, candida aids in digestion, nutrient absorption, and detoxification. Candida populations are kept under control in the body through the intestinal flora and a properly functioning immune system. Overgrowth begins when the intestine and healthy flora becomes altered (through diet, stress, antibiotic and antifungal medication, steroids, and oral contraceptive use) and immune defenses are reduced.

Candidiasis (candida overgrowth) contributes to a wide variety of health issues including gas and bloating, intestinal disturbances, sugar cravings and fruit intolerance, fatigue, brain fog, depression, autonomic nervous system disturbances, nail fungus, athlete's foot, jock itch, chronic yeast (vaginal) infections, and bladder infections.

An effective Biological Medicine approach is based on principles of reduce, replenish and rebalance. This will lead to a healthy digestive tract with balanced intestinal flora, proper digestion and a strong immune system; naturally keeping candida levels controlled throughout the body.

Pleo Alb 5x drops - Take 5 drops orally once daily.

Probiotic 7-in-1 – Take 1 cap twice daily.

BasicTab - Take 3 tabs twice daily with warm water on an empty stomach.

Note: Pleo Alb and Probiotic 7-in-1 can be taken at the same time. BasicTab should be taken on its own.

For Optimal Results: Your health care practitioner should assess symptoms to determine optimal length of treatment, which can take up to 8 weeks (2 kits). It is recommended to follow a diet to heal the gut and support a healthy intestinal system.

Medicinal ingredients: For ingredient and risk information, see box or individual product labels. Consult a health care practitioner before beginning this type of program.

Quality. Excellence.
Beyond Medicine.

This kit contains a selection of natural remedies manufactured by Sanum Kehlbeck, Germany, and distributed by Biomed International Products Corp.

Only sold through health care professionals.
