- Unique Omega-3 phospholipids deliver potent cell assimilation.
- Boosted Astaxanthin delivers elite muscle and powerful antioxidant protection.
AstaKrill

- Delivery - Omega-3s and Astaxanthin from krill are attached to phospholipid molecules, a benefit unique to krill. This enhances transportation and accessibility across the cell membrane barrier.
- EPA & DHA - provides the best cell concentrations and the highest bioavailability.

It’s Brain Food - the phospholipid aspect enhances permeability of the Omega-3s and antioxidants across the blood-brain barrier.

Stabilized - Potent antioxidant stability with naturally occurring and added astaxanthin.

Astaxanthin - Provides superior antioxidant protection against singlet oxygen species, free radical damage and lipid peroxidation.

USA Triathlon Team - Elite athletes use this for superior anti-inflammatory results and enhanced skeletal muscle stamina and endurance.
