SalvTonic

Heart nouveau...

Breakthrough Danshen/Natoginseng Formula for cardiovascular health

The #1 TCM for cardiovascular health recommended by physicians.

Testimonials

“I tried the SalvTonic and noticed a 10 point decline in my systolic and diastolic blood pressure with the first dose. After taking it now for 6 weeks I find the blood pressure effect sustained, I feel calmer and more relaxed. Both my exercise tolerance and my VO2 Max have increased. I have included it in my patient treatment plan for relief of diabetic foot neuropathy with good success. SalvTonic is one of the best new products I have seen in quite some time.”

~ M.P. - Healthcare Provider, Kelowna, B.C.

“I work at a clinic in Saskatchewan and also work as a nurse in a hospital, and have nursed for the past 25 years. I just wanted to share with you that I have seen clients whom have been diabetics for 25 years. They have taken SalvTonic and have been able to reverse the diabetic neuropathy that they have suffered from for the past 10 years. Nothing that they have taken as prescription medications have helped, but this has.”

~ Laurie Fortuna, RN, Saskatchewan
SalvTonic provides significant microcirculation benefits for heart, vascular, and brain health.

Effective and Fast Acting

- Relieve chest pain caused by cardiovascular diseases – sublingual dosage can help chest pain in minutes
- Reduce vascular diabetic complications
- Optional sublingual use for immediate action

Clinically Proven

- Over 100 published clinical trials – for angina pectoris, microcirculation, carotid atherosclerotic plaques, and Type 2 diabetes
- Undergoing Phase III FDA clinical trial for Unstable Angina (the first herbal remedy of this kind tested in the USA)

Safe

- No drug-related serious event effects reported in 917 publications
- GMO free, gluten free, vegan

SalvTonic is a herbal cardiovascular microcirculation formula that provides multi-target protection for the heart and blood vessels. The action improves circulation and blood flow, lowers total cholesterol, reduces plaque formation, and improves risk of thrombosis – all factors that contribute to angina, heart attack, stroke, pulmonary embolism, many other vascular conditions and cold extremities.

Medicinal Ingredients:

Each vegetarian capsule contains:
- Danshen (Salvia miltiorrhizae, root, 12.73:1 QCE) 665.49 mg = 52.28 mg
- Sanqi (Panax notoginseng, root, 12.73:1 QCE) 130.14 mg = 10.22 mg
- Borneol (Bingpian) 5 mg

Non-medicinal Ingredients:

Hydroxypropyl methylcellulose, Macrogol 6000.

Recommended Dose (adults):

Take 1 capsule three times daily.

Caution/warnings:

- Do not use if pregnant or breastfeeding.
- Consult a health care practitioner if symptoms persist.
- Store in the original container, closed, at room temperature.
- Keep out of reach of children.
SalvTonic provides significant microcirculation benefits for heart, vascular, and brain health.

Danshen is found to inhibit leukocyte adhesion, H2O2 production, and albumin leakage through the vessel wall. In complementary action, Notoginseng, inhibits leukocyte adhesion and mast cell degranulation. Each herbal compound in this formula has its own microcirculatory benefits reducing leukocyte-endothelium interaction and oxidative stress from Ischemia-Reprefusion-Induced injury.

By increasing microcirculation, SalvTonic can reduce angina and diabetic complications. In Traditional Chinese Medicine, SalvTonic is the Natural First Choice to invigorate blood, improve blood stasis and alleviate pain in the chest due to stagnation of Qi and blood flow.

Compound Danshen Dripping Pills for Stable Angina

Journal of Medicinal Plants Research, June, 2011
A meta-analysis of randomized controlled trials compared Danshen dripping pill (DSP) with isosorbide dinitrate (ID) in treatment of stable angina. A search of 1996 – 2010 databases was performed. 245 studies were screened including 1,536 patients (DSP therapy 847, ID therapy 689). There was evidence that DSP treatment improved angina symptoms more than ID treatment (93.4% vs. 73.8%). DSP as compared to ID treatment also resulted in superior electrocardiograms (99.7% vs. 46.3%). The results also showed that DSP plus routine therapy compared with ID plus routine therapy increased the improvement in symptoms and ECG results. This study suggested DSP is an effective therapy to treat stable angina.

Effect of Compound Danshen on urinary albumin excretion in type 2 diabetes mellitus

Medical Journal of China, May 2014
68 patients Type 2 diabetic patients were recruited from outpatients and hospitalized patients who did not take hypoglycemic drugs. Patients were randomly divided into control and treatment groups. Urinary albumin excretion rate and relationships between glycosylated hemoglobin and blood lipids were also investigated. After five years total cholesterol was significantly lowered and low density lipoprotein was significantly reduced. High density lipoprotein and triglyceride treatment were significantly different. Urinary albumin excretion rates were increased in the treatment groups. Diabetic nephropathy in the Danshen group was lower than the control group. Compound Danshen therapy can retard the occurrence and development of diabetic nephropathy, modulate blood lipids.

Medicinal Ingredients: Each vegetarian capsule contains:
Danshen (*Salvia miltiorrhiza*, root, 12.73:1 QCE 665.49 mg).......................... 52.28 mg
Sanqi (*Panax notoginseng*, root, 12.73:1 QCE 130.14 mg)....................... 10.22 mg
Borneol (*Bingpian*)............................................. 5 mg

Non-medicinal Ingredients: Hydroxypropyl methylcellulose, Macrogol 6000.

Recommended Dose (adults): Take 1 capsule three times daily.

Caution/warnings: Do not use if pregnant or breastfeeding. Consult a health care practitioner if symptoms persist.
Store in the original container, closed, at room temperature.
Keep out of reach of children.
